

Persa Pearl

The pattern of Persian Pearl Granite is highly varied, with each piece of stone displaying a different combination of colors and shapes. The veins and speckles can be thin and delicate, or thick and bold, and may be irregular or linear in shape. The overall effect is a stunning and unique stone that can add warmth and character to any space.

physical test results

		Imperial	Metric
Absorption by weight	ASTM C97	0.256%	0.256%
Density	ASTM C97	164.4 lb/ft ³	2 633.44 kg/m ³
Compressive strength	ASTM C170	34 027 Psi	234.61 MPa
Flexural strength	ASTM C880	2 495 Psi	14.9 MPa
Modulus of rupture	ASTM C99	1 937 Psi	13.36 MPa

Natural stone products inherently lack uniformity & are subject to variation in aesthetics—color, shade, finish, etc. and performance—hardness, strength. When & where your stone is quarried will affect color. Check local building codes prior to specification & installation to verify that the product technical characteristics comply with required parameters. Final selection should be made from sample submittals. The existence & dimensions of bevel may vary from lot to lot. WARNING: This product can expose you to chemicals known to cause cancer, including crystalline silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal.
